SUMMARY

Self-taught backend developer with practical experience in Java, Python, Go, and C#. I've built and maintained a range of backend-driven projects, from APIs to automation bots, and regularly share my code on GitHub. I'm passionate about designing clean, scalable backend systems and enjoy diving deep into real-world problems. While I'm confident with multiple languages, I'm currently focusing on strengthening my Java skills through hands-on work, aiming to grow in Java-based environments. I'm looking to join a team where I can both contribute and learn under experienced mentorship.

EDUCATION

- **BSc in Computer Engineering**
Iran's National University of Skill - Khorramabad , 2023-Present
Relevant Coursework:
 - o Data Structures & Algorithm Design
 - o C# Programming
 - o Database Fundamentals
- **High School Diploma in Mathematics and Physics**
Shahed Imam Khomeini High School - Shahreza , 2020-2023

TECHNICAL SKILLS

- **Programming Skills :**
 - o **Python :** Advanced
 - o **Go :** Beginner to Intermediate
 - o **C# :** Upper-Intermediate
 - o **SQL :** Advanced
 - o **HTML&CSS :** Intermediate
- **Tools :** Git, Docker, Bootstrap, WordPress, Figma, Photoshop, After Effect, Illustrator
- **Frameworks :**
 - o **ASP.NET:** Advanced
 - o **Django:** Beginner
 - o **Telegram Bot API (Python&C#):** Advanced
- **IDEs :**
 - o **Visual Studio**
 - o **VS Code**
 - o **PyCharm**
 - o **GoLand**
- **Databases :** SQL Server, MySQL, Redis, SQLite

PROJECTS

- **Class Management For Students - 2025-Present** github.com/mahmadii0/uninest
Developed a class and lecture management system for university students using Python, Django, and Redis. The bot allows students to manage lectures, share files, and interact within Telegram groups, while Django provides a user-friendly interface for handling forms and CRUD operations.

: COURSES

- **Java Full Course for Beginners, Programming with Mosh, Mosh-2025**
- **Database & Design Principle, Faradars Website Farshid Shirafkan-2025**
- **Introduction to GoLang Course, FreeCodeCamp Lane Wagner-2024**
- **Git, GitHub, and GitLab, Faradars Website Jodi Mirmirani-2024**
- **Python Course, CodeYad Website AmirHossein Amiri-2024**
- **ASP.NET Course, TopLearn Website Iman Madaeny-2023**
- **FunStrip Graphic Design Course Shahram Mehrad-2022**
- **ICPA Graphic Design Course Shahram Mehrad-2022**

INTERESTS :

- Back-end system architecture
- API development
- Cloud computing
- Team collaboration and collective

- **Tasktop Planning Website - 2025-Present** github.com/mahmadii0/Tasktop

Developed a collaborative task management web application using Go (backend), MySQL (database), and Git for version control. The system supports daily, monthly, and yearly planning with features such as note-taking, progress reporting, and an AI-based planning assistant. The backend was optimized for minimal database dependency. Frontend was handled by a teammate.

- **Python Programming Presentation - 2025** volunteer work

Prepared a detailed PowerPoint and Python demo project for a university class. The content covered Python basics with intentional coding errors to teach debugging techniques.

- **Django E-Commerce Website - 2024** volunteer work

Assisted in building a Django-based e-commerce website, helping with server-side logic and handling client-server communication.

- **Cafe Mafia Telegram Bot (Mafia Game) - 2024** github.com/mahmadii0/Cafe-Mafia-bot

Created a fully-featured Telegram bot for the Mafia game using Python and MySQL. The bot works in group chats, follows all game rules, and supports bilingual messages.

- **Dorostgar Telegram Bot (Spelling Correction) - 2024**

Developed a spelling-correction bot in C# for Telegram using a word-equivalent text file. The bot corrects spelling in group and private chats for fun and educational purposes.

- **Molk Practice Website - 2023**

Developed a sample website using ASP.NET MVC (C#), Bootstrap, and SQL Server after learning ASP.NET in university. Included a login system and design tools but was not deployed publicly.

- **Sherlock Website - 2020**

Built a WordPress site using Elementor focused on entertainment and logic puzzles. Managed hosting and domain configuration.

- **Takhteh Siah Blog - 2019-2020**

Launched an educational website on MihanBlog for secondary school students. Content focused on exam prep during the COVID-19 lockdown period.

- **Word Guessing Game - 2019-2020**

Designed a mobile guessing game using Appcch, focusing on visual puzzle solving and mobile UI.

- **Front-End Practice Projects - 2018-2019**

Created multiple static websites using HTML, CSS, and JavaScript to build foundational frontend development skills.

- **YouTube thumbnails for educational channel**

Designed YouTube thumbnails for "Zaman-e-Moarefe" channel and "Math with Moradkhani" channel (Photoshop, Illustrator).

- **Story banner for student fundraising campaign** volunteer work

Designed a donation story banner for underprivileged students (Photoshop).

- **Instagram templates and stories for Tasket, Personal and Timoty pages**

Designed Instagram templates for social media team of Timoty (Photoshop and Figma), and managed my own design page.
